## Skills

Swift and iOS app development, Scrum, Gitlab, Core Data, Cocoa Touch, MVVM, Reactive Programming, MVC, Design Patterns, Continuous Integration

## About Me

I always strive to do my best and challenge myself to progress in my career. My goal is to write code that is easy to understand, maintain, and extend, and aligns with Apple's design guidelines.

I enjoy developing native iOS and macOS apps with Swift, either programmatically using UIKit or with storyboards. With SwiftUI, there are exciting opportunities to develop cross-platform apps for macOS, iPadOS, tvOS, watchOS, and even xrOS using a shared codebase.

Outside of work, I enjoy cycling and specialty coffee. I am also multilingual and have contributed to localising open-source apps in German, French, and Italian.
